

Expert VBA/Macros Course Content

Working With Multiple Applications

Excel Application	<ul style="list-style-type: none"> Close file
Pivot Tables	Project6: A Project using Word
<ul style="list-style-type: none"> Create Pivot Table using VBA Change Data Source Refresh Pivot Table 	Text File (Notepad)
Project1: A Project using Pivot Table	<ul style="list-style-type: none"> Create Text file Read Data from Text file Working with existing Text file
Create Chart using VBA	<ul style="list-style-type: none"> Write data into Text file
Project2: A Project using Charts	<ul style="list-style-type: none"> Save Text file Close Text file
Add-ins	
Class Module	Project7: A Project using Text file
<ul style="list-style-type: none"> Create class module Using class module in VBA 	PowerPoint Presentation
Project3: A Project using Class Module	<ul style="list-style-type: none"> Create a simple presentation using VBA Create and paste Table from Excel to PowerPoint
MS-Access – Database	<ul style="list-style-type: none"> Copy Chart from Excel to PowerPoint
<ul style="list-style-type: none"> Open Connection Create Tables Insert Data into Tables Update data in Tables 	<ul style="list-style-type: none"> Open existing file Save file Close file
<ul style="list-style-type: none"> Extract Data from Tables and Load to Excel Cells 	Project8: A Project using Power Point Presentation
<ul style="list-style-type: none"> Extract Data from Tables and Load to Listbox Delete data from Tables Delete Tables Close Connection 	XML File
Project4: A Project using MS-Access Database	<ul style="list-style-type: none"> Create XML File Read XML File
SQL Server - Database	Project9: A Project using XML File
<ul style="list-style-type: none"> Open Connection Create Tables Insert Data into Tables Update data in Tables 	File System Object (Working with folders)
<ul style="list-style-type: none"> Extract Data from Tables and Load to Excel Cells Extract Data from Tables and Load to Listbox Delete data from Tables Delete Tables Close Connection 	<ul style="list-style-type: none"> Create Folder Move Folder Copy Folder Delete Folder Create File Move File Copy File Delete File Get file Properties from main folder Get file Properties from main & sub folders
Project5: A Project using SQL Server Database	Project10: A Project using File System Object
MS Word	Outlook Automation
<ul style="list-style-type: none"> Create Word file Read Data from Word file Open existing word file Write data to word file Save word file 	<ul style="list-style-type: none"> Create simple mail using VBA Create and send multiple mails Create mails from Templates Send attachments Paste Tables in Mail body Read mail body, properties and store in Excel
	Project11: A Project using Outlook

Web Application

Read Data from Web Application (Web Scrapping)

How to use send keys?

Web Application Automation using send Keys

Project12: A Project using Web Application
